Introduction

The e-CAM121_CUONX is a 12.3 MP camera from e-con Systems, a company with over two decades of experience in designing, developing, and manufacturing OEM cameras. This camera board targets a NVIDIA® Jetson Orin Nano™/Orin™ NX development kit.

The e-CAM121_CUONX camera consists of a custom lens camera module based on 1/2.3" IMX412-AAACK-D CMOS image sensor from SONY® with electronic rolling shutter and utilizes Jetson™ platforms in-built image signal processor (ISP).

Release Details

This section describes about identifying the deliverable.

- Release Version: **R03**
- Release Date: **04-September-2023**
- Product: **e-CAM121_CUONX**

Description	Jetson Orin Nano/NX
Host machine version required for flashing software onto Jetson Development kit.	Ubuntu 20.04 (64-bit) or Ubuntu 18.04 (64-bit).
Sample rootfs Ubuntu operating system to run on Jetson Development Kit.	Ubuntu 20.04 (64-bit)
JetPack Version	JetPack 5.1.2
L4T version	L4T_R35.4.1
Kernel version	5.10.120
eCAM_argus_camera version	0.99.3.3
MCU Firmware Version	2_1_120C_4_1_2_0_1913324

Troubleshooting

In this section, you can view the list of commonly occurring issues and their troubleshooting steps.

After flashing the Jetson Orin Nano™/Orin™ NX development kit, board is not booting, or the display is blank. How to solve this issue?

To solve this issue, please perform the following:

- Use the correct command with sudo permission whenever needed to extract the package.
- Use the PC with Ubuntu 18.04 64-bit or Ubuntu 20.04 64-bit for flashing.
- Maintain enough free space in hard disk before flashing.

The flashing process of the Jetson Orin Nano™/Orin™ NX development kit encounters an error. How to solve this issue?

To solve this issue, please perform the following:

- Make sure that the board is set in recovery mode by following the steps in this [Flashing to Specific Partition](#) link.
- Use the PC with Ubuntu 18.04 64-bit or Ubuntu 20.04 64-bit for flashing.
- Run the following commands to install python2.7 and retry flashing.

```
$ sudo apt-get update  
$ sudo apt-get install python
```

1. Can the camera binaries be installed without flashing the entire package?

Yes, please refer this [Flashing to Specific Partition](#) link to upgrade the modules, kernel image and device tree.

2. How can I get the updated package?

Please login to the [Developer Resources](#) website and download the latest release package.
